📋 PROFESSIONAL SUMMARY

Junior Software Developer with hands-on experience in backend and frontend development using **C#, .NET, ASP.NET Core, and React**. Actively involved in developing corporate applications, implementing new features, fixing bugs, and supporting production systems. Detail-oriented, eager to learn, and motivated to contribute to scalable, user-focused software solutions within collaborative development teams.

🎓 EDUCATION

Management Information Systems, Akdeniz University 09/2021 – 06/2025
Antalya, Turkey

💼 PROFESSIONAL EXPERIENCE

Junior Software Developer, ATG Hospitality 05/2025 – Present
Antalya, Turkey

- Contributed to **backend (C#, .NET, ASP.NET Core)** and **frontend (JavaScript, HTML, CSS)** development for corporate cloud-based applications.
- Implemented new features, fixed bugs, and improved performance of enterprise-level systems.
- Provided post-deployment technical support for applications used by **100+ internal users**.
- Created and maintained technical documentation for development requests.

Software Developer Intern, ATG Hospitality 02/2025 – 05/2025
Antalya, Turkey

- Worked on real-world corporate projects involving **full-stack software development**.
- Translated business and hotel operation requirements into software improvements.
- Improved skills in **basic programming, debugging, and clean code practices**.
- Collaborated within an **Agile-oriented development environment**.

📁 PROJECTS

FitLog – Fitness Tracking Application 09/2025 – Present

- Developed a **full-stack fitness tracking application** using **React (TypeScript)** and **ASP.NET Core Web API (C#)** following **Clean Architecture** principles.
- Implemented **JWT authentication** with ASP.NET Identity for secure user access.
- Built **RESTful APIs** using Entity Framework Core and PostgreSQL.
- Developed a responsive React frontend with protected routes and type-safe API integration.
- Source code available on GitHub.

🧠 SKILLS

Languages & Frameworks

C#, .NET, ASP.NET Core, JavaScript, React

Software Fundamentals

Object-Oriented Programming (OOP)

Web Technologies

HTML, CSS, Bootstrap

Soft Skills

Teamwork, Effective Communication, Analytical Thinking

Database Management

MySQL, MsSQL, PostgreSQL

Tools

Docker, GitHub

🌐 LANGUAGE

English

B2

📜 CERTIFICATES

Advanced Web Development (From Scratch) | Frontend Web Development Training | C# OOP Layered Architecture | Net 8 API/WEB | NLayer/Clean Architecture | The Complete Python Bootcamp | Docker: A Complete Guide from A to Z | SQL With Applications | Secure Coding Based On OWASP | Asp.Net Core Security | Artificial Intelligence Specialization
